

# Data Governance Scan Report

## Executive Summary

Run 950792ef-fa42-4df1-90f4-f0076a5779f9 scanned 2 table(s) in Scan\_db. Final score is 54.0 with a quality score of 100.0.

## Risk Overview

2 high-risk column(s), 2 PII column(s), and 2 unmasked PII column(s) were detected. DPDP status is ACTION\_REQUIRED.

## Quality Summary

Profiled 2 table(s). Data quality score is 100.0.

## AI Insights

- Customer PII exists in multiple columns without masking, increasing exposure risk.
- Low sample size reduces confidence in profiling and scoring.
- Inferred relationships across 1 column pair(s) suggest shared identifiers that should be validated for lineage and access control.

## PII Findings

- public.customers.customer\_name is classified as NAME with masking status NOT\_MASKED.
- public.customers.email is classified as EMAIL with masking status NOT\_MASKED.

## Relationship Signals

- public.customers -> public.orders (name\_match + type\_match + value\_overlap)

## Open Risks

- public.customers.customer\_name contains unmasked NAME PII.
- public.customers.email contains unmasked EMAIL PII.

## Open Issues

- Low sample size for public.customers.
- Primary key is not defined for public.customers.
- Low sample size for public.orders.
- Primary key is not defined for public.orders.

- Insufficient data for reliable profiling
- public.customers.customer\_name contains unmasked NAME PII.
- public.customers.email contains unmasked EMAIL PII.

## **Business Impact**

- Open metadata, ownership, integrity, or quality findings should be resolved before broad downstream consumption.

## **Recommendations**

- Increase profiling sample size for public.customers before relying on quality conclusions.
- Increase profiling sample size for public.orders before relying on quality conclusions.
- Apply masking or tokenization to public.customers.customer\_name.
- Apply masking or tokenization to public.customers.email.
- Mask, tokenize, or restrict access to public.customers.customer\_name.
- Mask, tokenize, or restrict access to public.customers.email.
